PROFESSIONAL SUMMARY

Saudi ERP Consultant with **5+ years of experience** implementing, configuring, and optimizing ERP systems in **real estate, property management, and investment sectors** in Saudi Arabia. Expert in **ERPNext and Logix ERP**, BRS documentation, workflow automation, and CSI code categorization. Skilled in **Power Automate, SSIS packages, SQL reporting**, and **Agile/Scrum methodologies**, enabling improved efficiency, decision-making, and organizational structure. Committed to supporting Saudi Vision 2030's digital transformation agenda through technology-driven business excellence.

CORE TECHNICAL SKILLS

- ERP Implementation & Administration (ERPNext & Logix ERP)
- Business Requirements Specification (BRS)
- Workflow Automation & Process Optimization
- CSI Code Categorization (Finance, PMO, Projects)
- Data Migration, Cleansing & Validation
- ERP Security & Access Control
- UAT, Testing & Post-Implementation Support
- Power Automate & SSIS Packages
- SQL & Database Reporting (SSMS, Report Builder)
- Power BI Dashboards & KPI Reporting
- Agile / Scrum Methodology

PROFESSIONAL EXPERIENCE

ERP Administrator / Business Analyst

Memar Development and Investment – Riyadh

Jan 2021 – Present

- Led **end-to-end implementation** of Logix ERP across 6 departments, aligning system functionalities with business, finance, and PMO needs — delivered on schedule and within scope.
- Prepared detailed **Business Requirements Specifications (BRS)** for multiple departments, producing over 15 detailed BRS documents covering Finance, Procurement, PMO, Projects, and Property Management.
- Categorized items using **CSI Codes**, enabling accurate **budgeting, forecasting, project cost tracking**, and **decision-making**.
- Created and automated **enterprise business processes and ERP workflows**, improving operational efficiency by over 30%, reducing approval cycle times and eliminating manual bottlenecks.
- Configured ERP modules: **Finance, Procurement, Projects, Property Management, Contracts**, ensuring proper system structure.
- Managed **data migration**, cleansing, validation, and reconciliation from 3 legacy systems, covering over 50,000 records with a 99%+ data accuracy rate post-migration.
- Defined **user roles, permissions, and security protocols**, enhancing compliance and data integrity.
- Conducted **UAT, system testing, and go-live support**, ensuring smooth ERP adoption with a successful go-live covering 5 integrated modules simultaneously.
- Delivered **end-user training** and operational documentation.
- Trained **40+ end-users** across 6 departments on ERP system usage, resulting in rapid adoption and minimal post-go-live support requests.
- Supported ERPNext implementation, documenting **BRS** for all key processes.
- Designed and improved **business processes**, embedding them into **ERP workflows**, streamlining approvals and operations.

- Collaborated with finance, PMO, and project teams to align system configuration with **forecasting, budgeting, and reporting requirements**.
 - Developed **SQL-based reports and dashboards** to improve management insights and decision-making.
 - Provided guidance to technical teams to ensure accurate ERP customization and system functionality.
 - Applied **Agile/Scrum practices** to plan, review, and deliver ERP solutions iteratively.
Extracted, validated, and analyzed data using **SQL (SSMS)** and **Report Builder**.
 - Developed dashboards and reports to monitor ERP performance, track KPIs, and support strategic planning.
 - Automated reporting and workflows using **Power Automate** and **SSIS packages**, reducing manual reporting effort by approximately 40% and significantly improving data timeliness and accuracy.
-

EDUCATION

Bachelor's Degree – Information Technology & Computing

Arab Open University, Riyadh | Graduated: 2021 | GPA: **3.54 / 4.0 – First Class Honors**

KEY PROJECTS

- **Logix ERP Full Implementation – Memar Development and Investment (2022–2023):** Led end-to-end deployment across Finance, PMO, Procurement, Property Management, and Contracts modules for a large-scale real estate investment portfolio. Delivered on time across 6 departments with 40+ trained users and full data migration from 3 legacy systems.
- **ERPNext Business Analysis & Process Documentation (2021–2022):** Authored BRS documentation for all key operational processes and designed ERP workflow configurations. Collaborated cross-functionally with finance, PMO, and project teams to embed business logic into system design.
- **Reporting Automation & Power BI Dashboard Suite (Ongoing):** Designed and automated a suite of management dashboards using Power BI, SQL

(SSMS), and Power Automate, tracking KPIs across Finance, Projects, and PMO. Reduced manual reporting workload by approximately 40% and enabled real-time strategic visibility for senior management.
